Dear Sir,

As desired appended below please find the clause in connection with Total Moisture for NTPC Power Houses linked with NCL Mines

Clause 10.2

COMPENSATION FOR EXCESS SUPERFICIAL MOISTURE

i) If the monthly weighted average Total Moisture in coal exceeds by the following percentages over the monthly weighted average Equilibrated Moisture, pro-rata correction factor equivalent to the percentage by which the Total Moisture exceeds the Equilibrated Moisture by the following percentages shall be applied to the weights recorded by the Weighment System for the purpose of billing & payment for supplies during that month.

Source of Supply	Permissible percentage limit over Equilibrated Moisture at 40°C and 60% RH.
(1)	(2)
Singrauli Coalfields	9.0%

ii) The limits as indicated in the above table shall be allowed on Equilibrated Moisture determined at 40 degree Celsius and 60% RH.

*Handwritten signature*

In case of DVB in the following changes have been made in the CSA in connection with Total Moisture: "The Total Moisture includes inherent moisture + 9% like NTPC and 1 to 3% moisture due to deshaling of coal on annualised basis."

CFRI STUDY - Since the CFRI has not made any study for the coal as such the CFRI study figures cannot be furnished. However, the above has been proved by taking physically one sample for T.M. in your presence and the same is sufficient as the proof for the T.M. which has been taken into account in the CSA Agreement.
